Abstract:

Dividend announcement is one of the key factors that influences the fluctuation in the share prices. The dividend is the cost of capital to equity shareholders. In recent years the securities and exchange board of India (SEBI) has initiated a number of reforms to make the Indian stock market at par with developed stock markets of the world. Dividend signals information to investors about the firm's future performance.

The impact of dividend announcements on share prices is likely to vary depending on the specific circumstances of each company and the overall market environment. On the one hand, dividend announcements can signal to investors that a company is financially strong and has a positive outlook for the future.

The purpose of this project is to observe whether dividend announcement has impact on share prices of the Nifty listed companies. The objective of this study is to know the impact of dividend announcement on share price in Nifty Listed Companies. In order to achieve the objective of the study, the secondary data was collected through NSE Website. After the data collection, the data was analysed using Paired t-Test.

The major findings from the project are few of the companies show impact of Dividend Announcement while most companies don't show impact of Dividend Announcement. So, it can be concluded that the overall, there is no impact of Dividend Announcement on Share price of Nifty Listed Companies. Investors should carefully consider a company's overall financial health, dividend policy and long-term growth prospects before making investment decisions based on dividend announcements.

Keywords:

Dividends, Share price, Nifty stocks, paired T test

1. Introduction:

Stock market swing is the result of stock market investor reaction. These responses are based on many things that investors take into account, which leads to a demand and supply phenomenon for a certain share and subsequent share price changes. Dividend announcement is one of the key factors that influences the fluctuation in the share prices. The dividend is the cost of capital to equity shareholders. In recent years the securities and exchange board of India (SEBI) has initiated a number of reforms to make the Indian stock market at par with developed stock markets of the world. One of such reforms is compulsory quarterly, annually earnings announcement and dividend announcements. Dividend signals information to investors about the firm's future performance. The impact of dividend announcements on share prices is likely to vary depending on the specific circumstances of each company and the overall market environment. If the dividend announcement has an impact on the market price of the shares, the market will react positively, if not negatively. On the one hand, dividend announcements can signal to investors that a company is financially strong and has a positive outlook for the future. This can lead to increased demand for the company's shares, which can drive up the share price. On the other hand, dividend payments can also reduce the amount of money that a company has available to reinvest in its operations. This can lead to slower growth in the long term, which can have a negative impact on the share price. The purpose of this project is to observe whether dividend announcement has impact on share prices on the Indian listed companies in Nifty.

2. Literature Review:

2.1. Thanawarat Suwanna “Impacts of dividend announcement on stock return”

Journal published in: Procedia- Social and behavioural sciences:

Year of publication: 2012

This study focuses on the impact of dividend announcement of the 60 Thai companies in financial industry listed in the Stock Exchange of Thailand (SET) during the period 2005-2010. (Suwanna, 2012)

Findings:

- The stock prices move upward significantly after dividend announcements. Abnormal return (AR) and cumulative abnormal return (CAR) from the market model are

statistically significantly revealed.

- The results confirm dividend signalling theory as the dividend announcements have significant impact on share prices.

2.2. Neetu Mehndiratta & Shuchi Gupta “Impact of dividend announcement on stock prices”

Journal published in: International Journal of Information Technology and Knowledge Management:

Year of publication: 2010

The present study attempts to contribute positively to the understanding of the behaviour of Indian share prices in relation to the dividend announcements. This paper to examine the price reactions of 15 listed companies surrounding sixty days of the announcement dates. (Mehndiratta, 2010)

2.2.1. Findings:

- Despite of investors do not gain significant value in the period preceding as well as on the dividend announcement day, yet they can gain value in the post announcement period.
- Investors do shift their security positions at the time of dividend announcement, which indicate that in post announcement period there is a possibility of information content in dividend announcement in NSE.

2.3. Glordon Newlove Asamoah “Impact of dividend announcement on share price behaviour in Ghana”

Journal published in: Journal of Business and Economics Research:

Year of publication: 2010

The purpose of the study was to ascertain whether there was an instantaneous reaction of the companies' share prices to dividend announcement in order to provide the basis for confirming or dispelling the EMH conclusions as far as the Ghana Stock Exchange was concerned. (Asamoah, 2010)

2.3.1. Findings:

- The major finding was that the GSE was not semi-strong efficient resulting in the

conclusion that the GSE must address itself to three forms of efficiency – operational efficiency, allocation efficiency and pricing efficiency.

2.4. Muhammad Aamir “Dividend announcements and the abnormal stock returns for the event firm and its rivals”

Journal published in: Austrian Journal of Business and Management Research:

Year of publication: 2011

Event study has been conducted in this paper on 26 announcements and the firms were belonging to cement and oil and gas sector of Pakistan. In this study data span of 2004-2008 has been covered. Impact of dividend announcement on stock prices of event and rival firms. (Aamir, 2011)

2.4.1. Findings:

- Dividend announcement depicts positive impact on share prices of the companies at the time of announcement as well as immediately after such announcements.

2.5. Nikunj Patel “Impact of Dividend Announcement on the stock prices of Indian Companies: An Empirical Evidence”

Journal published in: ELK Asia Pacific Journals:

Year of publication: 2014

This study aims to find the empirical evidences of stock dividend announcement on selected 20 companies of Indian stock market and try to investigate the existence of abnormal returns. Sample data was drawn from companies listed on the BSE that have announced dividend over the period January 2008 through December 2011. (Patel, 2014)

2.5.1. Findings:

- The results of paired t-test for means have shown that there are significant differences in average number of transactions before and after announcement during the period 2008 to 2011 for the companies like HUL, ITC, Jaiprakash, L & T, Reliance Industry, SBI, Tata Motor, and Wipro.

2.6. Md. Abdullah Al-Hasan “The effect of dividend policy on share price: An evaluative Study”

Journal published in: Journal of Economics and Finance:

Year of publication: 2011

The current study has been undertaken aiming at evaluating the effect of dividend policy on market price of share in the context of Bangladesh. The study has covered secondary data and analyzed the data by employing descriptive statistics, correlation and multiple regression models. (Al-Hasan, 2011)

2.6.1. Findings:

- The effect of dividend payout is more on market price than retention.
- The highly payout industries have more MPPS than low payout industries.
- The effect of dividend policy on market price supports the relevant theory of dividend policy i.e. Walter's model and Gordon's model.

2.7. Shaveta Gupta “Stock price Reaction to dividend announcements”

Journal published in: International Journal of Financial Management:

Year of publication: 2012

In this background, the present study is an attempt to study the stock price reaction to 65 dividend announcements (increase) by 28 companies during the period 2006-09 listed on BSE 30 Sensex. The analysis had been undertaken using Event study methodology. (Gupta, 2012)

2.7.1. Findings:

- The stock prices do react to increase in dividend announcements and dividend announcements do possess signalling property.
- The study also found out that Indian stock market is inefficient.

2.8. T. Mallikarjunappa “Stock price Reaction to dividend announcements”

Journal published in: Journal of management & public policy:

Year of publication: 2009

This paper examines the stock price reactions to dividends, one of the publicly available information, to test the semi-strong form of EMH. The study is based on the dividend announcements of 149 companies which are part of the BSE-200 Index that announced dividends for the financial year 2002. To test the stock price reactions, the expected returns are

found out by regressing the daily returns of companies and market index for the period January 1998 up to the relevant date applicable to companies. (T.Mallikarjunappa, 2009)

2.8.1. Findings:

- The AARs do not approximate to zero and CAARs show wide fluctuations indicating that abnormal returns can be earned several days after the event day.
- CAARs show that abnormal returns can be earned 24 days after the event day. From this we conclude that Indian market is not efficient in the semi-strong form.

2.9. Narindra Pal Singh “The effect of Dividend Policy on stock price: Evidence from the Indian Market”

Journal published in: Asia-Pacific Journal of Management Research & Innovation:

Year of publication: 2019

The present study has been undertaken to evaluate the effect of dividend policy on market prices of shares of Nifty 50 companies listed on the National Stock Exchange (NSE) for 2008–2017. The data have been analysed by employing multiple panel data regression models namely pooled regression, fixed effect model and random effect model. The Hausman test has been used to suggest the most appropriate regression model. (singh, 2019)

2.9.1. Findings:

- The random effect regression model supports the relevant approaches of dividend policy. So, there is significant effect of dividend policy on the stock price of firms.

2.10. Dona Ganeesha Priyangika Kaluarachchi “Impact of Dividend Announcement on stock price: Empirical Evidence of Colombo Stock Exchange”

Journal published in: Journal of Accounting, finance and Auditing studies:

Year of publication: 2019

The present study is an attempt to study the price reaction of 161 dividend announcements by 19 companies during the period 2013 to 2017 listed S & P 20 companies in CSE. The analysis had been developed using event study method. (Kaluarachchi, 2019)

2.10.1. Findings:

- The stock prices do react to dividend announcements and dividend announcements made the difference between share price prior to the dividend announcement and share price after dividend announcement.

3. Title of the Study:

“A Study on dividend announcement and its impact on share price of nifty listed companies”:

3.1. Objectives:

- To know the impact of dividend announcement on share price in Nifty listed companies.
- To know the dividend declared by the companies in the last 3 years.
- To know the yearly effects of the Dividend Announcement.
- To analyze the percentage change in the share price on account of dividend announcement.

3.2. Hypotheses:

Ho: Dividend Announcement has no significant impact on share price of Nifty Listed Companies.

Ha: Dividend Announcement has a significant impact on share price of Nifty Listed companies.

4. Research Methodology:

4.1. Purpose of the study:

This study helps to know the impact on share price one week before and week after the date of announcement of dividend for the period of 3 years i.e., 2021 to 2023

4.2. Data Collection:

Secondary data relating to company profile, industry overview, review of literature, historical share prices of nifty companies has been collected from NSE website, research journal, company website etc.

4.3. Sampling:

For the purpose of the study, I have selected Nifty Indian listed companies representing diverse sector of industry. I have collected the share prices of one week before and one week after the date of announcement of dividend, for a period of 3 years i.e., 2021 to 2023. Out of 50 nifty listed companies, I have selected 30 companies for the study.

4.4. Tools used:

- Simple statistical tools like percentage and graph have been used for the analysis
- Paired T test with two sample means is used to determine impact of dividend announcement on share price (Pre-announcement share price and post announcement share price)

5. Analysis and Interpretation:

<i>Table 1: Summary Result of Paired t-Test for Pre and Post-Announcement of Dividend for the Year 2021</i>

5.5. Interpretation:

From the table 35 it is observed that top 5 companies with the highest dividend percentage in 2023 are LTIMindtree, Bajaj Finance, Bajaj Finserv, Hero Motocorp, and NTPC. The companies with the consistent increase in dividend percentage are Bajaj Finance, Titan Company, Tata Consumer Products, Infosys, Maruti Suzuki, Tech Mahindra, Grasim Industries, Sun pharma, ICICI Bank, Reliance Industries. The most common dividend percentage is 5.00%, which is paid by 6 companies. Overall, the dividend table shows that Indian companies are paying out a healthy level of dividends to their shareholders.

6. Findings:

- The market price of TCS Ltd, JSW Steel Ltd, PowerGrid Corp Ltd are found to have significant ($\sigma < 0.05$) sensitivity towards the dividend announcements as indicated by the t-test conducted for 3 years.
- Dividend announcement is found to have no impact on market price for the remaining 27 scrips taken for the study.
- The yearly analysis indicates that the market price is sensitive to dividend announcements for the year 2021 it is found that out of 30 companies selected for study 20 companies have the significant impact.
- The yearly analysis indicates that the market price is sensitive to dividend announcements for the year 2022 it is found that out of 30 companies selected for study 19 companies have the significance impact.
- The yearly analysis indicates that the market price is sensitive to dividend

announcements for the year 2023 it is found that out of 30 companies selected for study 22 companies have the significance impact.

- From the table 35 it is observed that top 5 companies with the highest dividend percentage in 2023 are LTIMindtree, Bajaj Finance, Bajaj Finserv, Hero Motocorp, and NTPC.
- The companies with the consistent increase in dividend percentage are Bajaj Finance, Titan Company, Tata Consumer Products, Infosys, Maruti Suzuki, Tech Mahindra, Grasim Industries, Sun pharma, ICICI Bank, Reliance Industries. The most common dividend percentage is 5.00%, which is paid by 6 companies. Overall, the dividend table shows that Indian companies are paying out a healthy level of dividends to their shareholders.

7. Conclusion:

The study was conducted for 30 stocks for nifty 50 to know the price sensitivity towards dividend announcement. The study indicates that 27 companies are insensitive to dividend announcements. Only 3 companies that is TCS Ltd, JSW Steel Ltd, PowerGrid Corp Ltd are found to be sensitive towards dividend announcement. The investors can base their investment decisions on profitability trends of the companies rather than the dividends declared. The CFOs and companies should concentrate on ROI, Cost of capital and PAT to increase the market price instead of dividend policy.

8. Suggestions:

- Investors should carefully evaluate a company's dividend policy when making investment decisions. Companies with consistent and growing dividend payouts may offer a more reliable return on investment.
- Investors should not rely solely on dividend announcements as a signal of a company's value. It is crucial to assess the company's overall financial health, growth prospects, and management capabilities.
- Investors may consider seeking guidance from financial advisors to help them make informed decisions about dividend-paying stocks and align their investment strategies with their risk tolerance and financial goals.
